GRASPANC : Study design

- Metastatic pancreatic adenocarcinoma
- Second line, previously treated with gemcitabine based chemotherapy or FOLFIRINOX
- Performance status 0 and 1
- N=141 (70% ASNS 0/1, 30% ASNS 2/3)

RANDOMIZE 2:1

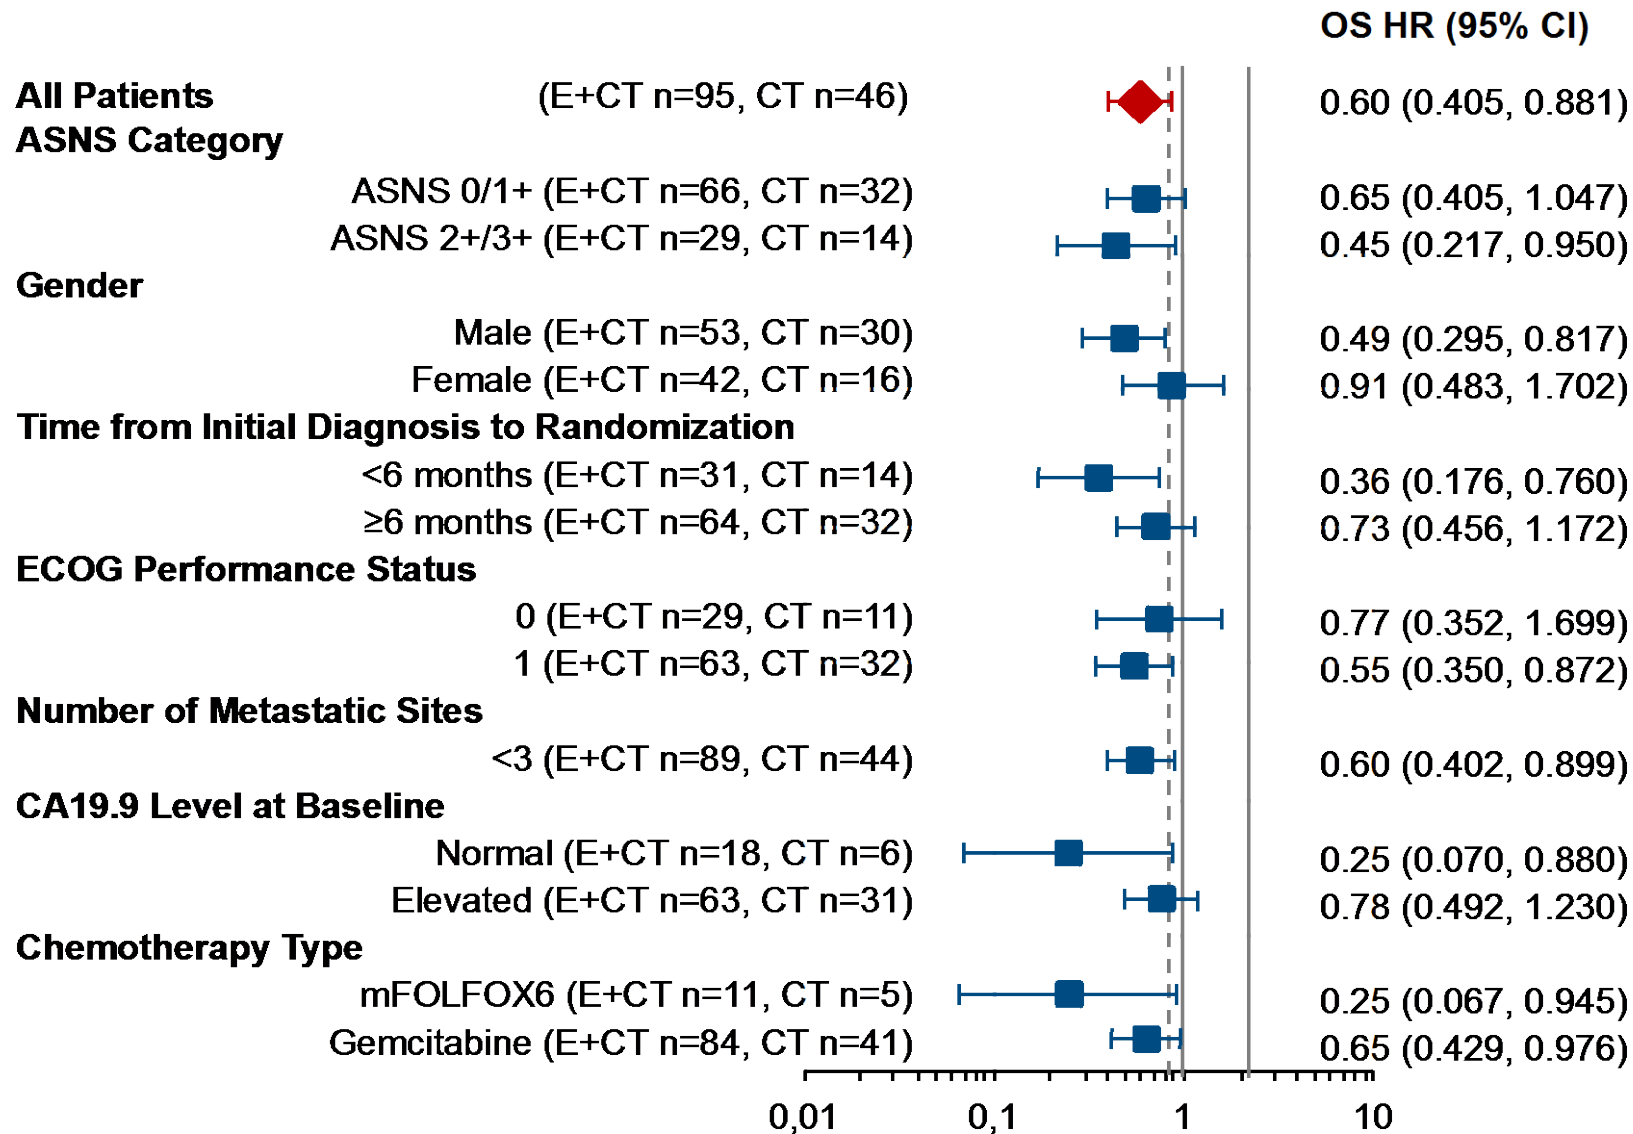

Gemcitabine
or FOLFOX
+ eryaspase
(N = 95)

Gemcitabine
or FOLFOX
(N=46)

Follow up

6 cycles of 4 weeks

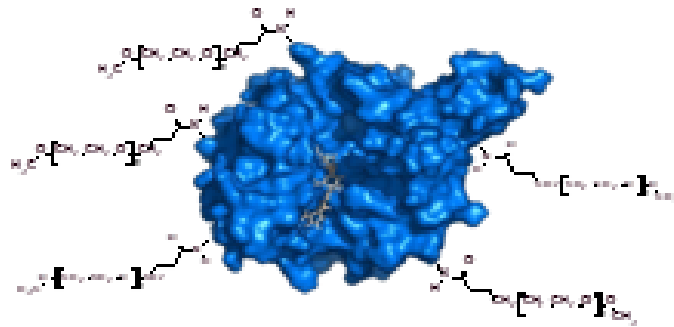

Overall survival benefit – consistent across prognostic factors

E + CT: Eryaspase Arm; CT : Chemotherapy Alone Arm

PEGPH20

- PEGPH20 is a PEGylated, neutral-pH-active human hyaluronidase PH20 produced by recombinant DNA technology.

PEGylated form of rHuPH20

Gemcitabine-Nab paclitaxel +/- PEGPH20 (phase II)

- **Survie sans progression chez les HA-High – étapes 1 et 2**
